

Dr. Jelena Tešić is an Associate Professor of Computer Science and Research Lead at the Center for Analytics and Data Science at Texas State University, San Marcos, TX, USA. She received her Dipl. Ing. (1998) in Electrical Engineering from the University of Belgrade, Serbia, M.Sc. (1999), and Ph.D. (2004) in Electrical and Computer Engineering from the University of California, Santa Barbara. Prior to joining Texas State, she was a Research Staff Member at IBM Watson Research Center (2004-2009) and Senior Research Scientist at Mayachitra Inc., California (2009-2017). Dr. Tešić's research focuses on developing novel AI methods and scalable algorithms for analyzing large, unstructured, multi-modal data. She holds seven U.S. patents, and her work citations have an h-index of 24 and an i10-index of 39. She is a senior member of the National Academy of Inventors (NAI) and the Institute of Electrical and Electronics Engineers (IEEE). Her research has been sponsored by DoD, DoE, NSF, NIH, USDA, and industry partners. Dr. Tešić serves on organizing committees for the 2026-2027 ACM ICMR and 2028 ACM MMSys conferences and is a senior member of IEEE and NAI. Dr. Tešić is co-PI on the Science Fond of the Republic of Serbia DIASPORA 2025-2026 grant led by Dr. Damjanović-Vasilic.

Dr. Nikoleta Theodoropoulou is an Associate Professor of Physics at Texas State University, San Marcos, TX. She received her B.S. in Physics from the University of Athens, Greece (1995), and her Ph.D. in Physics from the University of Florida (2002), followed by postdoctoral research at MIT's Francis Bitter Magnet Laboratory and at Michigan State University. Her research focuses on epitaxial growth and electronic characterization of oxide thin films and semiconductor heterostructures using Molecular Beam Epitaxy, with emphasis on spin-orbit interactions and correlated electron systems. Her work was funded by the NSF, DoD, and industry, including an NSF CAREER Award. She has published 57 peer-reviewed articles with over 4,000 citations with an h-index of 24.

Dr. Rodion Podorozhny is an Associate Professor of Computer Science at Texas State University, San Marcos, TX, USA. He received his B.Sc. in Information and Control Systems from Peter the Great St. Petersburg Polytechnic University, M.Sc. in Computer Science from the University of Massachusetts, Amherst (1997), and Ph.D. in Software Engineering from the University of Texas, Austin (2004). His research interests include automated synthesis and formal verification of mission-critical software systems, cyber-physical multi-agent systems, and optimization methods for deep learning. His work was supported by TXST innovation programs and industry, with an h-index of 14 and an i10-index of 19.
