

Freiburg 2007

# XXV ICPEAC

ICPEAC 2007 Freiburg, Germany  
25 - 31 July 2007

25<sup>th</sup> International Conference  
on Photonic, Electronic  
and Atomic Collisions

**VOLUME I**

**ABSTRACTS of  
CONTRIBUTED  
PAPERS**

Edited by:

Josef Anton, Robert Moshhammer,  
Claus Dieter Schröter and Joachim Ullrich

# ACKNOWLEDGEMENTS

XXV ICPEAC gratefully acknowledges financial support from

*Agilent / Acquiris*  
*American Physical Society (APS), Physical Review*  
*BFi OptiLas*  
*Coherent (Deutschland) GmbH*  
*Deutsche Forschungsgemeinschaft (DFG)*  
*Gesellschaft für Schwerionenforschung mbH (GSI)*  
*iseg Spezialelektronik GmbH*  
*Institute of Physics Publishing Ltd, Bristol, UK*  
*International Union of Pure and Applied Physics (IUPAP)*  
*Kapteyn-Murnane Laboratories Inc., USA*  
*Land Baden-Württemberg*  
*Linde Kryotechnik AG*  
*Max-Planck-Gesellschaft zur Förderung der Wissenschaften e. V.*  
*Max-Planck-Institut für Kernphysik (MPI-K)*

# ORGANIZATION

The XXV ICPEAC is organized by  
the Local Committee, governed by the  
International ICPEAC Executive Committee.

*Local Organization*  
*Max-Planck-Gesellschaft*  
*zur Förderung der Wissenschaften e. V.*

represented by the

*Max-Planck-Institut für Kernphysik*  
*Saupfercheckweg 1, D-69117 Heidelberg, Germany.*

## EXECUTIVE COMMITTEE

### Chairman

Yasunori Yamazaki,  
Atomic Physics Laboratory  
RIKEN  
Wako, Saitama 351-0198  
Japan  
Phone: +81-48-462-4644  
Fax: +81-48-462-4644  
E-Mail: yasunori@riken.jp

### Vice Chairman

Joachim Burgdörfer  
Institute for Theoretical Physics  
Vienna University of Technology  
Wiedner Hauptstr. 8  
A 1040 Vienna, Austria  
Phone: +43-1-58801x13610  
Fax: +43-1-58801x13699  
E-Mail: joachim.burgdoerfer@tuwien.ac.at

### Secretary

Klaus Bartschat  
Department of Physics and Astronomy  
Drake University  
Des Moines, IA 50311, USA  
Tel.: +1-515-271-3750  
Fax: +1-515-271-1943  
Email: klaus.bartschat@drake.edu

### Treasurer

Henrik Cederquist  
Atomic Physics  
Stockholm University  
Alba Nova University Centrum  
SE-10691, Stockholm, Sweden  
Tel.: +46-8-5537-8626  
Fax: +46-8-5537-8601

Continuing our investigation of the inelastic electron scattering in magnesium [1] we have extended our interest at electron impact excitation of the  $3s3d\ ^1D_2$  state. Papers related with excitation of the  $3s3d\ ^1D_2$  state in magnesium are rare. Differential cross sections (DCSs) for  $3s3d\ ^1D_2$  excitation were measured by Williams and Trajmar [2] at 10, 20 and 40 eV electron impact energies. Mitroy and McCarthy [3] calculated DCS using five-state close coupling (CC5) approximation. Kaur *et al.* [4] used the relativistic distorted-wave (RDW) approximation; and Srivastava *et al.* [5] used RDW-approximation in single-configuration ground state (SCGS) and multi-configuration ground state (MCGS) approach for calculation of the  $3s3d\ ^1D_2$  DCS.

The apparatus used in the measurements is a for the conventional cross-beam spectrometer. DCSs for the  $3s3d\ ^1D_2$  state were determined from  $4^\circ$  to  $150^\circ$  scattering angles on the basis of the  $(3s3d)^1D_2/(3s3p)^1P_1$  intensity ratios, in energy-loss spectra and DCSs for the  $3s3p\ ^1P_1$  state were reported in [1]. The  $3s3d\ ^1D_2$  state in energy-loss spectra is completely resolved from other close states ( $3s4s\ ^1S_0$  and  $3s4p\ ^1P_1$ ). The measurements were carried out at the temperature 780 K. Angular resolution of the spectrometer is estimated to be  $1.5^\circ$ , and the overall system energy resolution is 120 meV. The energy scale was calibrated against the  $3s3p\ ^1P_1$  excitation threshold of Mg at 4.346 eV.

In order to compare our experimental  $(3s3d)^1D_2/(3s3p)^1P_1$  intensity ratios with other available results we calculated this ratio for Williams and Trajmar [2] measurement and MCGS [5] and CC5 [3] calculations. These ratios are presented at figure 1. It appears that there is good agreement among all results at small scattering angles (up to  $60^\circ$ ). At higher scattering angles agreement in magnitude between both theories and both measurements is relatively good. The agreement is better in shape and

minima and maxima positions of the ratios. From presented result we can conclude that both measurements and the theoretical calculations should be improved toward better agreements.

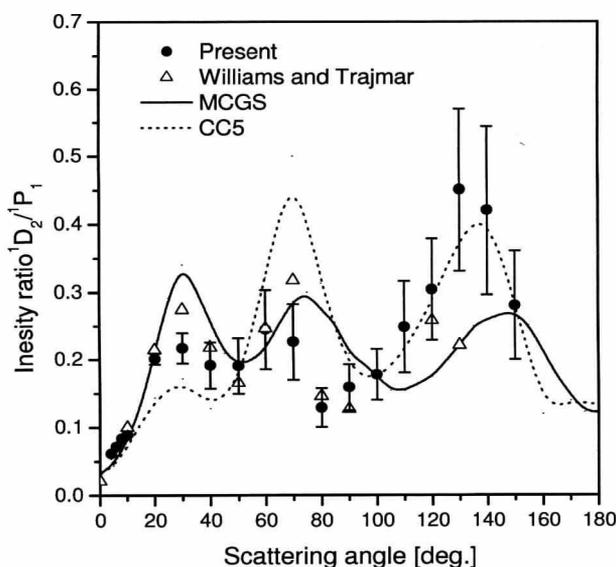

Fig. 1 Intensity ratio  $^1D_2/^1P_1$  versus scattering angle at  $E_0=20$  eV impact energy.
